

Welcome

What is GRIDit?

GRIDit is an interactive web-based platform designed to manage and visualize (subsea) asset data. It allows users to analyze, visualize, and report on various datasets, combining project-specific and publicly available data into a single source of truth.

Who is this guide for?

This manual is intended for all GRIDit users, including:

- **New users** who need guidance on getting started.
- **Project managers** looking to manage and analyze asset-related data in a GRIDit project.
- **Technical users** who require advanced functionalities.

What You'll Find in This Guide

Getting Started - How to log in, navigate the interface, and configure basic settings.

Working with Data - Uploading, managing, and visualizing datasets.

Analysis & Reporting - Using tools to generate insights and export reports.

Collaboration - Sharing data with stakeholders and managing user access.

Customization - Adjusting settings and workflows to fit your needs.

Need Help?

If you have any questions or need further assistance, feel free to contact our support team at support@gridit.nl.
